Summary

Experienced Developer; Software Architect – startup experience.

Jobs

Head Infrastructure Engineer @ Umee (Now UX Chain)

2021-12 to 2023-03

UX Chain, formerly UMEE, is a layer-one blockchain within the Cosmos ecosystem, dedicated to enhancing user experience and fostering innovation in decentralised finance (DeFi). As a universal cross-chain DeFi hub, it provides the groundwork for future DApps and financial components, known as “money legos,” within the DeFi landscape.

Automated deployment of several blockchain test networks. Used Pulumi in golang to automate genesis ceremony and wallet funding on these test networks. Built out & trained a team to manage the devops & infrastructure side.

Senior Software Engineer @ Endpoint Escrow Inc.

2019-09 to 2020-12

Endpoint is a company which is disrupting escrow/mortgage by streamlining and automating much of the process.

- Implemented (in production) a strategy to communicate with the existing legacy database while building new features.

- Helping facilitate transition to Microservice Architecture from our monolith
- Collaborated on GraphQL api to service our internal admin needs
- Extended & Created new databases schemas (dynamo) for new services being built

Lead Software Developer @ Weedmaps Media

2011-01 to 2012-12

WeedMaps helps medical marijuana patients find dispensaries and provides helpful reviews and menus.

Worked on various projects including coupons, menus, and server optimization (linux).

I spent nearly a year overhauling the search engine in elasticsearch with custom weights. Small team of 3 people.
